

## Our Team

After providing over 30 years of services in the Las Vegas, Nevada area, three principals formed **kme** Architects in 2009 to offer a full service architectural firm. We are a diversified firm headquartered in Las Vegas with an office in Atlanta, and embrace all aspects of sustainable design. Our proven capabilities in a wide range of architectural services have enabled our firm to successfully design within a broad scope of building types and obtain a level of success that few small firms have achieved.

**kme** manages and designs projects in the private and public sector including government, commercial, education, interior design, and the residential market. From being the lead designers of McDonalds USA \$5 billion rebranding, to historical building renovation projects, **kme** provides a holistic approach to each project from concept design to occupancy. Our proven capabilities in green building design has lead our firm to provide services such as:

Sustainable Design  
LEED Consulting  
Landscape Design  
Master planning

Project Programming  
Building Commissioning  
Interior Design  
Historic Preservation

**kme** is a certified Small Business, Minority Business Enterprise (MBE) and Disadvantaged Business Enterprise (DBE). **kme** was nominated as best small firm in Las Vegas in 2010 by the Las Vegas Chamber of Commerce and was selected by the City of Las Vegas to lead the master planning and Building Commissioning of the oldest elementary school in Las Vegas' history.

**kme's** mission is to respond to the needs of our clients by providing eco-friendly ideas and aesthetically pleasing facilities that are tailored for the end user. We have extensive experience in government facilities, which includes the design of offices, classrooms and labs within a facility. The end result was successful spaces that engineers, military members and civilians alike are able to use effectively and comfortably.

We understand today's economy is challenging for all of our clients so we implemented our Building Information Model (BIM) system which allows multiple projects to be managed efficiently and economically.
